An existing sewage disposal system must comply with the setbacks outlined below:

Source: Alberta Private Sewage System Standards of Practice (2015)

An existing private sewage system may have to be inspected as a condition of subdivision approval to ensure compliance with the requirements listed above. Should the existing sewage system not be compliant with the current code of practice, you will be required to upgrade to a compliant system at your own expense.

We strongly recommend that you research installation costs with accredited private sewage contractors.
